Terms $B_{\bar{N}}(2N+3)$ through $B_{\bar{N}}(2N+20)$ when $N \equiv 4 \pmod 7$

When $N \equiv 4 \pmod 7$ and $N \geq 72$, a pattern with 7 interleaved linear sequences lasts from index $N+67$ through $2N+2$. If $N \geq 200$, there are 18 terms after this pattern ends. Below are calculations of all of these terms along with the necessary lower bound on N for each calculation to be valid. Record large N bounds exceeding 72 are presented in bold.
